

Mission accomplished - Deploy to Maven Central

 **ELMAR DOTT**

(M. Schulz) studied at HS Merseburg, Germany, computer science and holds an engineers degree in software engineering. He tweets regularly about several technical topics. The main topics in his field of work are Build and Configuration Management, Software Architecture and Release Management.

About more than 15 years he is working in different large Web Application projects all over the world. He is an independent consultant / trainer. To share his knowledge he gives talks on conferences, if he is not writing on a new article about software engineering. <https://elmar-dott.com>

+ Consultant + Writer + Speaker + Trainer +

- ➊ What is a Repository Manager?
- ➋ Sonatype Nexus OSS
- ➌ Publishing Sources and Artifacts
- ➍ How to prepare your project.
- ➎ Register your repository
- ➏ Uploads & Artifact validation

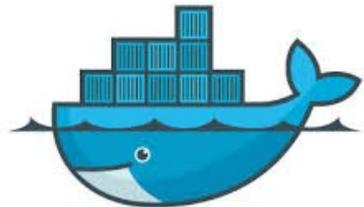

DEPENDENCY MANAGEMENT

JavaScript

Bower

DockerHub

docker

Java

.NET

Each platform & also almost each build tool have an own dependency management to deal with artifacts.

REPOSITORY MANAGER

- build tools, dependency management, packet manager & repository manager
- essential part of the build / CI-CD infrastructure
- speed up the build & deploy pipeline
- storage and archive binary artifacts
- deal with multiple formats
- two major providers JFrog Artifactory & **Sonatype Nexus OSS**

SONATYPE NEXUS OSS

Sonatype Nexus Repository Manager
OSS 3.35.0-02

MAVEN DEPLOYMENT

POM – consume a repository

```
<repositories>
  <repository>
    <id>nexus-oss</id>
    <url>http://localhost:8082/repository/maven-public/</url>
  </repository>
</repositories>
```

SETTINGS - credentials

```
<servers>
  <server>
    <id>nexus-oss</id>
    <username>mvn-deployer</username>
    <password>#myS3cr3t#</password>
  </server>
</servers>
```

POM – deploy artifacts

```
<distributionManagement>
  <snapshotRepository>
    <id>nexus-oss</id>
    <url>${release.repo}</url>
  </snapshotRepository>
  <repository>
    <id>nexus-oss</id>
    <url>${snapshot.repo}</url>
  </repository>
  <site>
    <id>webdav</id>
    <name>Local deployed site</name>
    <url>${site.repo}</url>
  </site>
</distributionManagement>
```

local repository

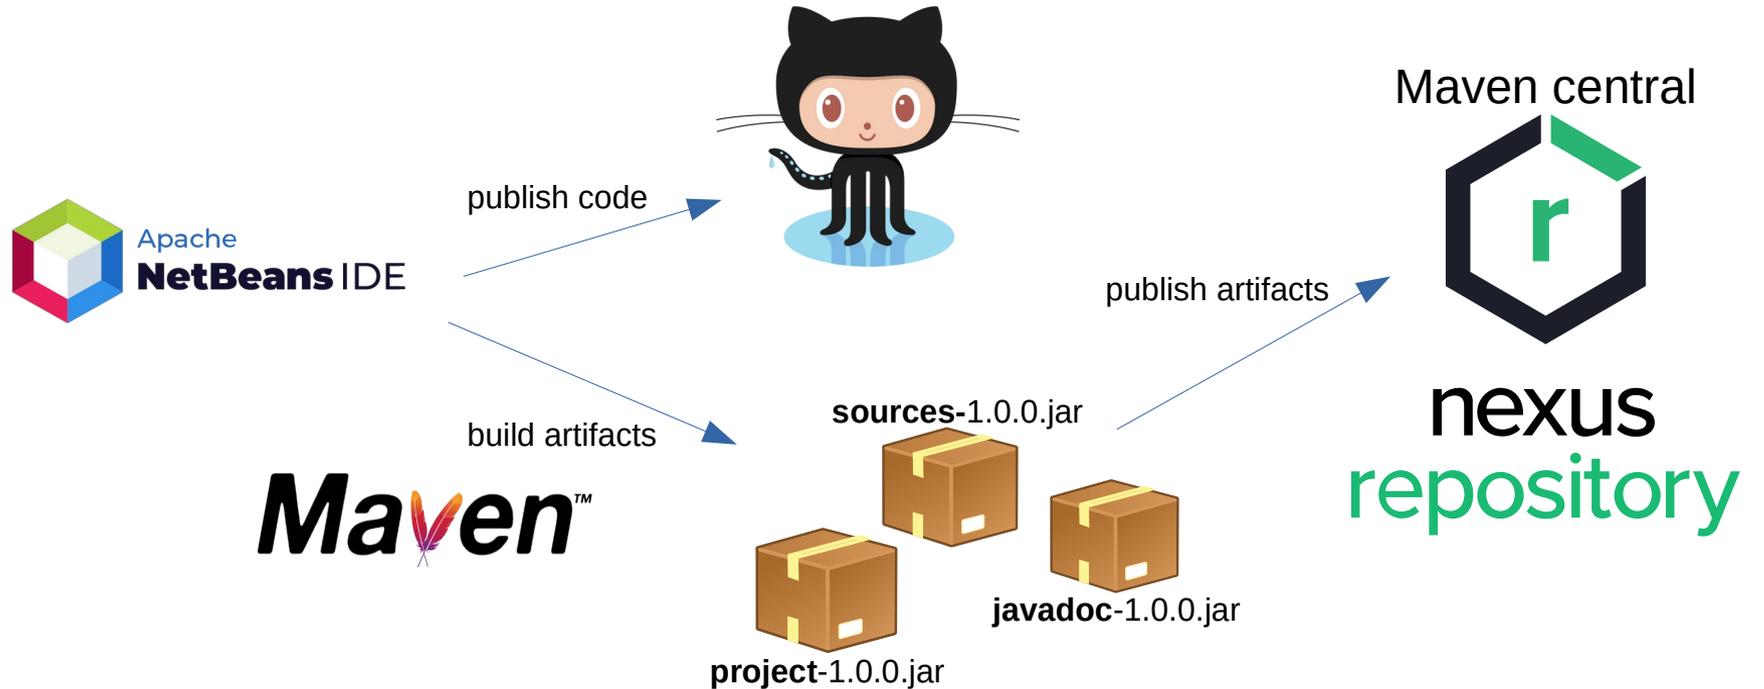

mvn install

remote repository

mvn deploy

FROM GITHUB 2 MVN CENTRAL

MAVEN PLUGINS

```
<plugin>
  <groupId>org.apache.maven.plugins</groupId>
  <artifactId>maven-javadoc-plugin</artifactId>
  <version>3.3.0</version>

  </configuration>
</plugin>
```

REGISTER AT SONATYPE JIRA

The screenshot shows a Jira issue page for 'New Project TogetherPlatform' in the 'Community Support - Open Source Project Repository Hosting / OSSRH-38818' project. The issue is titled 'New Project TogetherPlatform' and is in a 'CLOSED' state. The issue details include: Type: New Project, Priority: Major, Resolution: Fixed, Labels: None, Group Id: io.github.together, Project URL: https://github.com/ElmarDott/TP-CORE, SCM url: https://github.com/ElmarDott/TP-CORE.git, Username(s): marco.schulz, and Already Synced to Central: No. The description reads: 'I'd like to publish the the released artifacts of Version 1.0 of TP-Core on a public repository. And also all future Releases. regards .marco'. The 'People' section shows the Assignee as Joel Orlina and Reporter as Marco Schulz. The 'Dates' section shows Created: 03/31/18 05:25 AM, Updated: 06/04/21 02:19 PM, and Resolved: 04/04/18 08:41 PM. The 'Agile' section has a 'View on Board' link. The page also features a navigation bar with 'sonatype' logo and various menu items like 'Dashboards', 'Projects', 'Issues', 'Boards', 'Issue Templates', and 'Create'. A search bar and user profile icons are also visible in the top right.

OSS SONATYPE ARTIFACT UPLOAD

The screenshot shows the Sonatype Nexus Repository Manager interface for a Staging Upload. The top navigation bar includes the Sonatype logo, the text "nexus repository manager", the user name "marco.schulz", and the version "Nexus Repository Manager 2.14.20-02".

The main content area is titled "Staging Upload" and contains the following sections:

- Select Staging Upload Mode:** A dropdown menu for "Upload Mode" with a help icon. Below it, three instructions are provided:
 - Artifact(s) with a POM:** GAV will be defined from a POM file.
 - Artifact(s) with GAV:** GAV needs to be manually defined.
 - Artifact Bundle:** A bundle file produced by [Maven Repository Plugin](#), which should contain the POM.
- Select Artifact(s) for Upload:** A section with a "Select Artifact(s) to Upload..." button. Below this are three input fields: "Filename:", "Classifier:", and "Extension:", each with a help icon. An "Add Artifact" button is located below the "Extension" field.
- Artifacts:** A table area for listing artifacts, currently empty. It includes "Remove" and "Remove All" buttons.
- Description:** A text area for providing a description, with a star icon and a help icon.

The left sidebar contains navigation links for "Artifact Search", "Advanced Search", "Views/Repositories", "Central Statistics Repositories", "Build Promotion", "Staging Profiles", "Staging Repositories", "Staging Ruleset", "Staging Upload", and "Help".
